Contact us to receive a tailored quote for your school

Before the workshop we will meet with your core student leaders and help them plan the day. During the workshop our facilitators will be there to support and debrief, tying together leadership lessons while your students take the lead.

Spend the morning providing high school student leaders with tangible leadership skills, then help them prepare and deliver a leadership workshop for students from the local primary school in the afternoon.

In the lead up, we'll help you develop a survey for the whole student body. During the workshop, your student leaders will follow a design thinking process to develop initiatives that target the key problem areas identified in your student survey.

Over the course of this workshop, we will support your students to plan an event that they are responsible for running. We'll provide them with tangible skills and feedback to support them so that the event will run smoothly!
